

Precision Health & Integrative Care Journey for Brain Health

Understand. Predict. Compose. Access. Execute. Measure. Learn.

The need. Complex brain-health journeys are fragmented across providers, diagnostics, treatments, pharmacy, coverage, travel, and family support. IHX creates one coordinated journey around the person and the outcome they are trying to achieve.

INTELLIGENCE

What IHX Delivers

- Complete, personalized pathways - not disconnected referrals or vendor products.
- Clinical, diagnostic, access, financial, and support components assembled around member goals.
- Best available value across clinically appropriate options, including contracted provider pricing, Tribal 340B where eligible, and negotiated InXite partner pricing.
- Execution support for referrals, scheduling, prior authorization, testing, pharmacy, telehealth, transportation, and blockers.
- Dynamic pathway recomposition whenever evidence, access, coverage, or member priorities change.
- Neutral recommendation integrity with clinical fit separated from member fit, access, time, and cost.

Initial focus

- TBI / neurological injury
- Alzheimer's / cognitive decline
- Glioblastoma / complex brain cancer
- Tribal communities and veterans

Integrated partner classes

- Evidence: diagnostics, biomarkers, monitoring
- Care: providers, therapeutics, rehab, pharmacy, trials
- Enablement: network, payer intelligence, telehealth, transportation, authorization, care management

Accountability

IHX Outcome Contract: time to diagnosis/testing/authorization/specialist/treatment, care-plan adherence, access, quality of life/function, cost per episode, savings, medication affordability, care gaps, and population outcomes.

Long-term vision. Brain health is the starting point. The same architecture can extend to cancer, cardiovascular disease, diabetes, behavioral health, prevention, wellness, and longevity - one evolving health intelligence and journey execution system throughout life.
